Vinicius Eduardo da Silva

Senior Full-Stack Engineer · Java · React & Angular · Distributed Systems

Blumenau, SC, Brazil | viniciuseduardo0702@hotmail.com | +55 47 98482-4970 | linkedin.com/in/vinicius-esilva

Full-stack software engineer with 5 years building production web applications — Java / Spring Boot backends, React / TypeScript and Angular frontends. End-to-end feature ownership: scoping, estimating, and delivering with minimal supervision, including release planning as Squad Leader. Experienced delivering production software in Agile, distributed teams — collaborating with Product Managers, QA, Architects, and stakeholders — including international projects.

EXPERIENCE

Software Developer IV — Senior Sistemas

Sep 2025 – Jul 2026

Document management & digital signature products at one of Brazil's largest ERP vendors

- **Feature ownership:** designed and delivered features end to end — Java / Spring Boot services and REST APIs (PostgreSQL, AWS) for document processing, digital signatures, contact management, and batch imports, used across thousands of corporate accounts.
- **Distributed systems:** built asynchronous, event-driven integrations on RabbitMQ across dozens of interdependent microservices, managing cross-service version compatibility to keep releases free of breaking changes.
- **Reliability:** drove log traceability with Kibana / Logstash and led troubleshooting in staging and production, shortening time-to-diagnosis for cross-service incidents.
- **Leadership:** as Squad Leader, ran release planning, scope, and estimations across backend and frontend services, partnering with product stakeholders to keep delivery on track; enforced quality via code reviews, JUnit / Mockito, and CI/CD.

Full-Stack Engineer (Intern → Senior) — Cast Group

Aug 2021 – Sep 2025

IT consultancy — full-stack delivery for Bosch, TJMG (Minas Gerais Court of Justice), Usiminas, Prodemge, and Studio Z

- **TJMG (2025):** founding team of a browser extension automating government procurement notices — days of drafting reduced to minutes; built the React front end and the Spring Boot APIs over complex data queries.
- **Usiminas (2024–25):** migrated legacy JSF logistics systems to Java / Quarkus services with Angular frontends; CI/CD with Jenkins and GitLab.
- **Prodemge (2023):** built statewide school asset-tracking and hospital scheduling web applications (Java, Vue.js).
- **Bosch (2022–23):** international project run entirely in English — requirements, refinements, estimations, sprint reviews — with TypeScript, Node.js, Next.js, and MongoDB.
- **Studio Z (2021–22):** e-commerce restocking platform — Spring Boot microservices, SOAP/WSDL integrations, SQL optimization, Red Hat OpenShift deployments.

CORE SKILLS

FRONTEND

React · TypeScript · Angular · Next.js · RxJS · HTML / CSS

BACKEND

Java · Spring Boot · Node.js · REST APIs · Microservices · RabbitMQ · Distributed Systems

DATA

PostgreSQL · SQL · Spring Data JPA · Hibernate · Flyway · MongoDB

CLOUD & DEVOPS

AWS (S3, Lambda) · CI/CD · Kibana · Logstash · GitLab · Jira · Azure DevOps · Jenkins · OpenShift · Bitbucket

QUALITY & PRACTICES

System Design · JUnit · Mockito · OpenAPI / Swagger · Code Review · Estimations · AI-assisted development (Claude, Codex) · Agile / Scrum

EDUCATION

Postgraduate, Software Engineering
Estácio · 2024 – 2025

Technologist, Systems Analysis & Development
Estácio · 2020 – 2022

LANGUAGES

English — Advanced (C1)
Portuguese — Native
